## Swinging Hopper Power Rotate

**Effortless positioning for swing-around  
hoppers on Hi-Efficiency Augers.**

**Electric Drive with manual switch and  
RC operation, or Hydraulic Drive.**

**The Radio Control transmitter lets  
you position the wagon and the  
swinging hopper from the tractor  
seat - a real one-man operation!!**

Standard Spotlight  
(electric drive only)  
for low light operation.

The drive wheels are aligned with the hopper swing arc, minimizing ruts and keeping the work area in good condition longer. Adjustable wheel plates let you raise the hopper to minimize spillage, or lower it for extra clearance under low unloading hoppers. Semi-pneumatic tires provide good traction when the work area gets slippery. Drives can be mounted either side of the hopper. Power Rotate systems will also retrofit your existing swing-around hopper.

Power Hopper Rotate systems are available for 10" augers with single and twin screw hoppers, and 12" augers with twin screw hoppers. Power Rotate systems will also retrofit your existing swing-around hopper.
